

# Current and Future Trend of Programming

Hadi Heydarizadeh Shali

08/09/2024

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

## Goals:

Determining the trend of programming languages, databases, and platforms worldwide

## Dataset:

Subset of Stack Overflow survey in 2019

## Areas:

- Current Technology Usage
- Future Technology Trends
- Demographics

shutterstock.com · 709248262

# INTRODUCTION

---

- Skills needed and will be trend:
  - The most popular languages
  - Working with Data bases
  - And Platforms
- Sources of information and data:
  - Annual income of jobs posting
  - Surveys data
- Take away point:
  - Data analyst should be up to date and know what's going on based on the trends

# METHODOLOGY

---

- **Data Sources:**
- **Stack Overflow:**
  - Survey data focusing on trends in technology usage and preferences.
- **Survey Data Technologies:**
- **Current Trends:**
  - Analyzing data on languages, databases, platforms, and web frameworks currently in use.
- **Future Trends:**
  - Examining interest in learning new technologies, including languages, databases, platforms, and web frameworks.
- **Demographics Data:**
- **Attributes:**
  - Gender (Man and Woman), Age, Formal Education Level, and Country of Residence.
- **Data Filtering:**
- **Cleaning Process:**
  - Removal of empty or null entries.
- **Filtering Criteria:**
  - Data filtered to include only responses from individuals identifying as either Man or Woman.

# Results :

## Trends in Programming Language

- Python language is growing so fast and is the leading language for the future

## Trends in Databases

- PostgreSQL is the leading and trend data base for the future

## Platforms and Web frames

- Windows was the most usage platform but nowadays Linux is the leading platform

## Age and Education

- Age limits of 25-40 years and college students are the most users

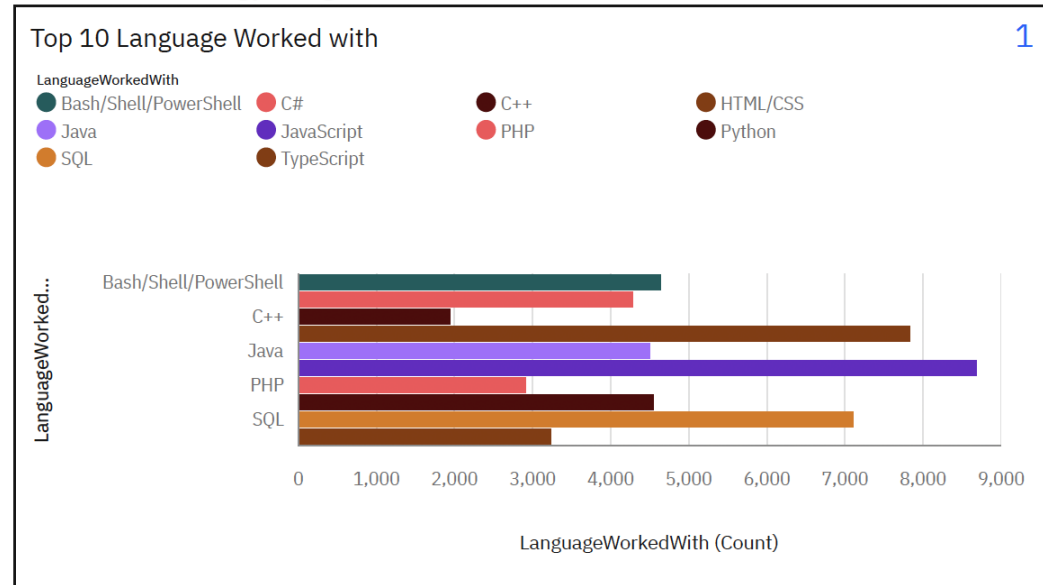

## Location

- China is the leading country

# PROGRAMMING LANGUAGE TRENDS

## Current Year

Current Technology Usage

## Next Year

Future Technology Trend

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- By the year of this survey, JavaScript was the leading language used by the user
- HTML/CSS and SQL were the next two in a row

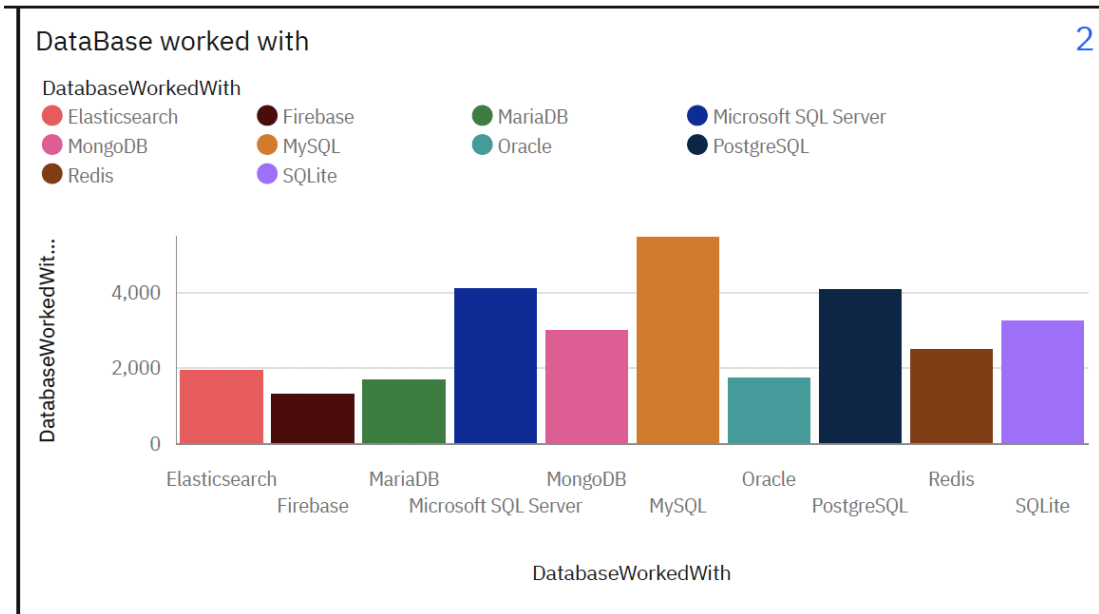

## Implications

- Python which was not in the top 3 list, would be the leading language in the next year.

# DATABASE TRENDS

## Current Year

## Next Year

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- MySQL and Microsoft SQL Server were the leading database by 2019
- Oracle is not in the top 10 databases anymore
- DynamoDB is a new to databases

## Implications

- PostgreSQL is going to be the next leader in databases by the next year

# DASHBOARD

---

You can see the report webpage on github using:

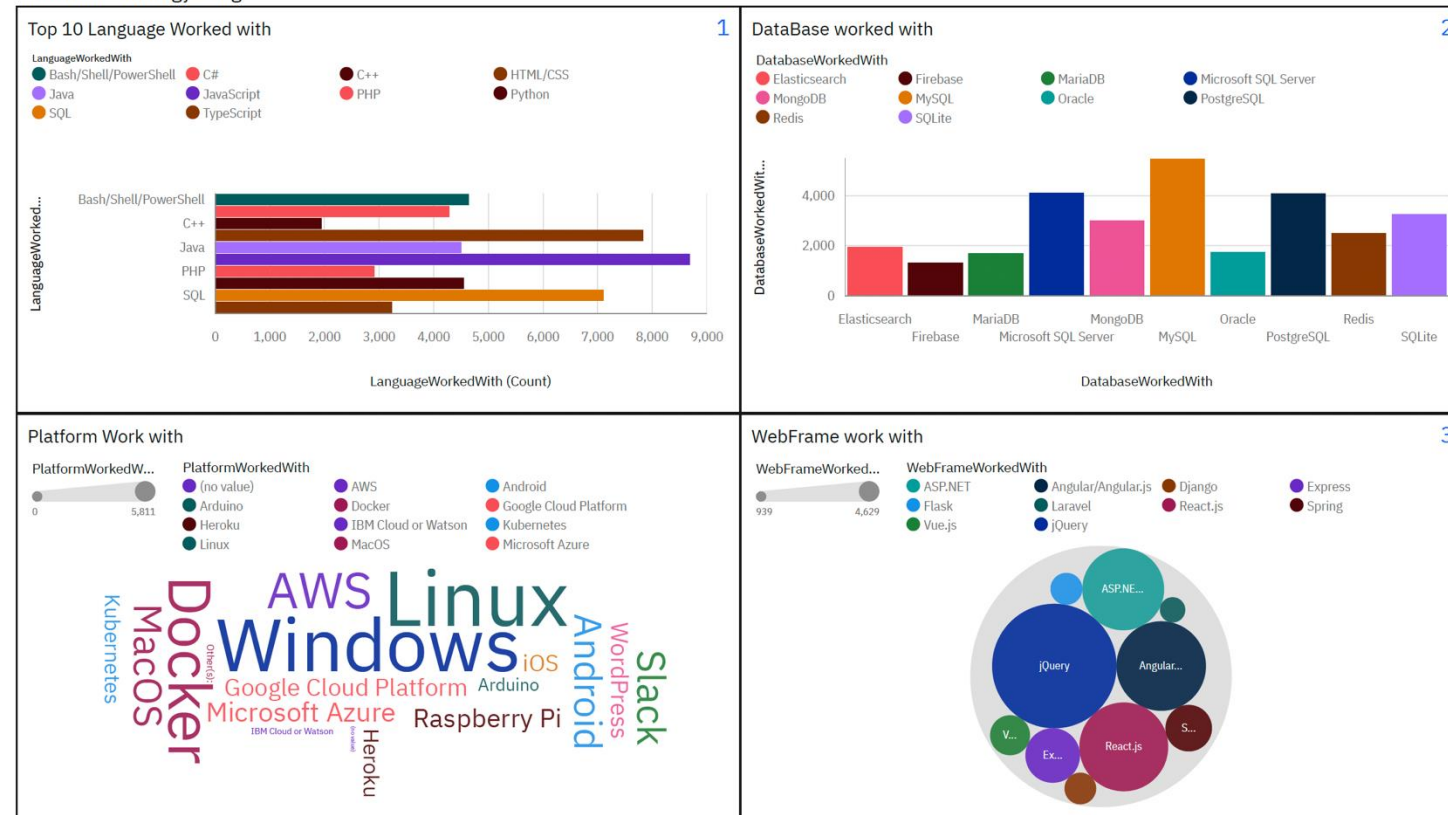

[https://github.com/HadiShali/Final-Project\\_Coursera/blob/main/Final%20Project.pdf](https://github.com/HadiShali/Final-Project_Coursera/blob/main/Final%20Project.pdf)

# DASHBOARD Current Technology Usage

Final Project

8/8/24, 10:42 AM

## Current Technology Usage

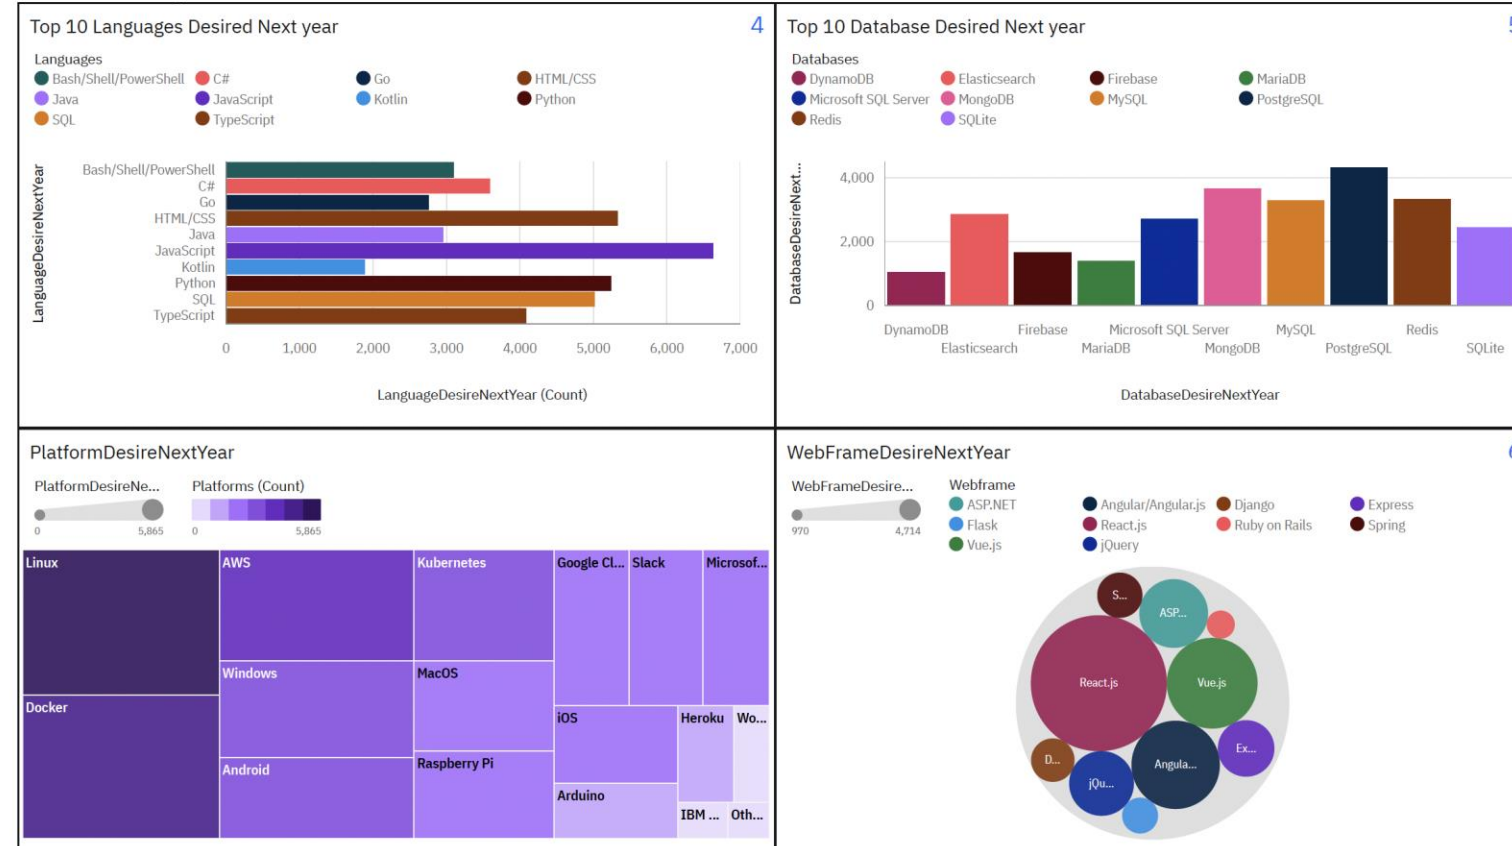

# DASHBOARD Future Technology Trend

Final Project

8/8/24, 10:42 AM

## Future Technology Trend

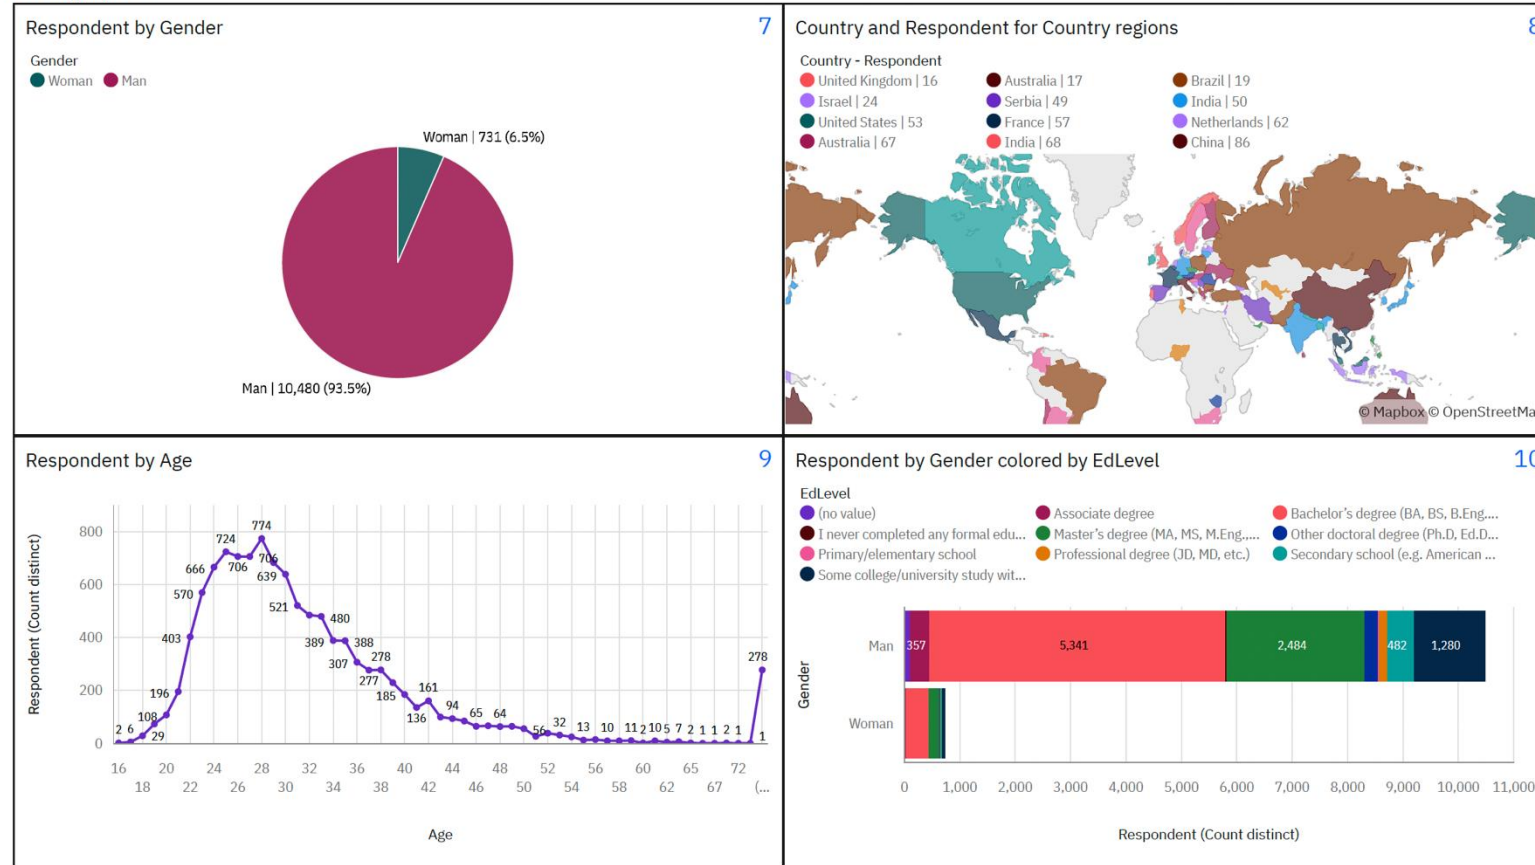

# DASHBOARD Demographic

Final Project

8/8/24, 10:42 AM

## Demographics

# DISCUSSION

---

- All the languages, platforms, and databases are growing
- Most of the users are with the gender of man or woman in the range of 25-45 years
- China is the leading country in this survey.
- Most of the respondents are men (around 94%)

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- New programming languages are growing
- Also new web frames are becoming more privileges
- Students are the most users of guiding websites

## Implications

- Any data analyst should be update and be aware
- Needing to coding is growing up

# CONCLUSION

---

- Python's Continued Rise: Python solidifies its position as a top programming language, reflecting ongoing trends in developer preferences.
- Early Engagement: A significant portion of developers start coding early, indicating the importance of early education and access to coding resources.
- Varied Global Perspectives: Optimism about the future varies significantly by region, with Chinese developers being the most hopeful and Western Europeans more cautious.
- Impact of Stack Overflow: The platform continues to be a valuable resource, saving developers considerable time in their workflows.

# APPENDIX

---

- additional charts, or tables that we created during the analysis phase:

# JOB POSTINGS

---

# POPULAR LANGUAGES
